# TRAUMA EDGE ATLS AND BEYOND

*Hello everyone,*

*Welcome to Trauma Edge.*

*We are happy to invite you all to our Lisie Medicity hospital, Ernakulam, for a new age advanced trauma management workshop. Our hands-on trauma skills program is designed to help you strengthen the practical competencies needed for an effective and timely management of life threatening emergencies in Trauma.*

*Our experts will demonstrate and provide hands-on training of various procedures using mannequins and tissue models. We aim to give you an essential procedural experience in critical interventions such as airway management, surgical cricothyroidotomy, intercostal drain insertion etc. The workshop is intended for all the Junior Residents and Post-Graduate trainees from Emergency medicine and Surgical specialities. We aim to bridge the gap between theoretical knowledge and a real-world emergency room.*

*Join us on 24th of April 2026 from 8.30am, for a special day of brainstorming sessions and academic excellence.*

*Regards,*

*Organising Team, Trauma Edge.*

*Lisie Medicity, Kaloor.*
